Welcome to WWRS

Information on Worldwide Warehouse Redistribution Services

Introduction

WWRS redistributes serviceable, fully functioning spare parts and support equipment, previously purchased under the Arms Export Control Act, as a source for filling Foreign Military Sales (FMS) requisitions. USG requisitions may be filled upon receipt of a funded MIPR.

Goals

WWRS is designed to

- Reduce FMS customers' excess inventories
- Provide access to materiel at reduced cost
- Reduce lead times through redistribution of on-the-shelf assets instead of new procurement
- Enable purchase of needed FMS assets by material sellers with the proceeds or withdraw proceeds to their national treasury

Buyer Info

This page gives you the details on becoming a buyer to include a link to our training slides and User's Handbook

Buyer Information

Details on becoming a buyer with WWRS

[How to Become a WWRS Buyer](#)
[WWRS Handbook](#)

Two Methods of Purchasing WWRS Materiel

1. Materiel may be ordered by submitting a nonrecurring requisition with the Routing Identifier Code (RIC) of 'FWW' (indicating WWRS as the desired source of supply) to the Security Assistance Management Information System (SAMIS) against the appropriate blanket order FMS requisition case. Requisitions that contain a NMCS indicator or the advice codes of BV, 6P, 6V, or 6W (which indicate a specific materiel source) are rejected with a F6 rejection code. STARR-PC now supports the input of RIC 'FWW', using the pull down menu.
2. USAF FMS requisitions submitted to SAMIS with the RIC of 'FNH' are automatically eligible for fill action by the WWRS when:
 - The Cooperative Logistics Supply Support Arrangement (CLSSA) Termination and Liability file does not contain the requested NSN
 - The FMS retention program quantity for the requested NSN is equal to zero or stock of serviceable assets does not exist at the ALC
 - The demand code is other than recurring (R)
 - The requisition does not contain the [advice codes](#) of BV, 6P, 6V, or 6W

All requisitions are filled in the order of receipt. WWRS requisitions with RIC 'FWW' are treated as "fill or kill" requisitions. If the desired WWRS materiel is depleted, the requisition is canceled. All other requisitions received with RIC 'FNH' will be passed on to another DoD source of supply, if WWRS cannot fill or partially fill the order. Status and bill lines are provided to SAMIS.

Purchaser Charges

Purchasers pay the seller's listed materiel price and the actual transportation charge to the first destination freight forwarder from the In-Transit Inspection Point for all shipments above \$100 US Dollars. If shipment by collect, commercial bill of lading is not authorized in the Military Assistance Program Address Directory (MAPAD), the transportation costs are shown as an additional bill line on the requisition. If the delivery term code justifies movement within the Defense Transportation System, a US Government Bill of Lading is issued and the appropriate charge assessed below the line on the applicable FMS case. Proceeds received from the purchaser for WWRS materiel are transferred through the WWRS clearing account to the respective sellers' trust funds at DFAS-Indianapolis.

Becoming a Material Seller

USAF FMS customers who want to become material sellers should submit a Letter of Request (LOR), along with a data set of their excess serviceable material. The required format is spelled out in Section III of the WWRS Customer Handbook. In addition to the material identification information (NSN), the seller must provide the quantity, the desired unit price (in US dollars and cents), and an alphanumeric ID code. The alphanumeric code is a unique ID assigned by the seller to indicate material storage point, weapon system, in-country location, or account. The first 2 position consists of the country code. The remaining 3 positions are assigned by the seller. The PMO suggest sellers request a case for ten (10) percent of their material's value; however, other case values are acceptable. The case is written based upon an estimated 5-year period of performance.

Sellers are required to have internet access and to request an AFSAC On-Line password to view the WWRS web pages. Internet access should include an e-mail capability for efficient and effective communications with the WWRS PMO. Internet/Web access fees are the seller's responsibility. When the WWRS LOA is implemented, AFSAC loads the seller data-set information on the WWRS web page. Potential purchasers may browse the listings for desired material, but will not know the identity of material sellers. When sellers wish to add NSNs to the list, change quantities, or prices, they may use the WWRS web site or provide a new or partial data set for update. The new data will replace all of the existing data for the respective NSN. The PMO will decrement the quantities of NSNs as redistributions occur.

Seller Order Processing

Upon AFSAC's receipt of a requisition for WWRS listed material, the selected seller is sent a Redistribution Order (RDO). The RDO will state the desired NSN, quantity, and extended dollar value. The RDO is the authority for the seller to ship the material to the In-Transit Inspection Point once they have acknowledged notification by providing appropriate shipping data back to the PMO.

Financial

Sellers pay a 8.5% redistribution fee per Redistribution Order (RDO) for all material received at the In-Transit Inspection Point regardless of whether or not the material passes inspection. Fees for seller-arranged lot transfers of at least 20 line items are discounted an additional 10% or 20%, depending upon the value of the lot transfer. The redistribution fee is billed against the WWRS LOA/case when the material is shipped to the purchaser or back to the seller.

The Seller's WWRS case is ordinarily written for approximately 8.5% of the estimated value of the material for sale. Redistribution will cease when the value of the WWRS services line is reached. Case managers shall notify selling country points of contact when line values have been committed or expended by 75%. The WWRS case has been approved for the terms of sale of "Cash with Acceptance, Balance as Billed". The terms of sale require an initial deposit of half of the administrative surcharge plus 5% of the line value (total 6.9%) to cover costs of projected first quarter redistributions. Subsequent quarterly billings will be based on actual redistribution charges that occur during the respective quarter. The funds required to pay the redistribution fees will be taken from the proceeds earned after their deposit into the seller's trust fund. The remaining funds may be transferred to an alternate FMS case, withdrawn to the sellers national treasury, or left in the WWRS cash holding account at DFAS-Indianapolis.

Sellers who are eligible for Defense Transportation Services may request a transportation line be added to their WWRS case.
